ENGINE VALUE FEATURES

The 4.3 Liter V6 gas engine is a naturally aspirated 90° V6 with 4-cycle design. Advantages of this engine include:

- Efficiency of electronic fuel injection.
- Improved mixing of fuel and air as a result of the swirl-port induction system.
- More complete fuel burning due to the centralized spark plug combustion chamber.
- Volumetric efficiency is the major result of the higher compression ratio. The higher compression ratio is coupled with the Electronic Spark Control (ESC), which controls spark knock.

The basic features of the 4.3 Liter V6 gas engine are:

- Electronic fuel injection.
- 9.3 to 1 compression ratio with Electronic Spark Control (ESC) to sense and control spark knock.
- Swirl-port cylinder heads for improved mixing of fuel and air.
- Copper-core spark plugs help prevent plug fouling.
- Single-point air injection.
- Even firing results in smooth operation and allows a low idle speed.
- Stone-ground, micro-finished crankshaft.
- Tubular stainless steel exhaust manifolds.
- Low-tension oil rings for reduced friction.

- Rocker arm covers fit into a recess in the cylinder heads for better sealing.
- Cassette water pump seal.
- Net horsepower: 130 @ 3600 RPM. Net torque (lb.-ft.): 210 @ 2000 RPM.
